ABOUT ME

Passionate about computers in general since the age of 8. Able to adapt to all types of business environments and solve problems efficiently and quickly thanks to my current experience as an IT Technician/Fullstack Web Developer and my academic background. Eager to learn and improve every day both professionally and personally.

WORK EXPERIENCE

IT Technician & Developer at Enveseur S.L

Enveseur S.L. is an e-commerce company that sells envelopes and packaging solutions throughout most of Europe.

August 2022 - Today

Main activities:

- Solve all kinds of problems with the company's computer systems.
- Install and configure all the digital tools used by the company for new employees.
- Work together with Envelopes Ltd. (a UK subsidiary of Enveseur) to unify the network, Microsoft tenants and the computer tools the companies use on a daily basis, such as their ERP, TeamViewer or Sophos.
- Laravel code maintenance and optimization.
- Full-stack development of company intranet websites (server configuration, database design, backend and frontend)
- Develop solutions that automate recurring processes using Bash, Python and PHP.

HelpDesk Technician at XTA.cat

XTA.cat is a local telecommunications company that brings internet services to remote places in Catalonia.

October 2021 - February 2022

Main activity:

- Solving entry and intermediate-level **telecommunication issues**, involving fiber optics, routers, and telephony.

Other activities:

- Generic IT Technician tasks such as replacing all HDDs with SSDs, configuring a Windows system to suit the company's needs and creating an image of said OS once finished to automatically install it on all the company's computers.

This experience honed my **problem-solving skills** and **analytical thinking**.
